

# THOMPSON'S BANK GETTING ON ITS FEET

Fourth Dividend Will be  
Paid Out Within Two  
Weeks.

UNIONTOWN, Pa., June 26.—The fourth dividend within almost a year, amounting to \$120,000, will be paid out to the 2,000 depositors of the First National bank in two weeks. This announcement was made by John H. Strawn, receiver of the bank.

The bank closed in January, 1915, when J. V. Thompson, its president, was involved in financial difficulties. Mr. Strawn, who has been receiver for the bank since the closing, stated yesterday that each of the four dividends amounted to \$120,000, totaling \$500,000 which the bank has paid its depositors.

It is believed that within a short time the bank will be turned over to its stockholders and will have paid 100 cents on the dollar. Upon restoration to the stockholders it is believed that the bank shares will retain their par value of \$200 each.

## ACCEPTS RESIGNATIONS

MOONSVILLE, W. Va., June 26.—The Wheeling Presbytery of the Presbyterian church, Synod of West Virginia, at its summer meeting here today, accepted the resignation of the Rev. Arthur E. Hubbard of Fairview, and the Rev. Henry E. Nicklen, of Sherrard. The Rev. Hubbard has accepted the presidency of the Mary Allen School for Girls in Texas, and the Rev. Nicklen has accepted a pastorate in the Parkersburg Presbytery.

## DEMI-GODS IN DUNGAREES LOOT MOUNTAINS OF GOLD

A view of Juneau, Alaska, which typifies the bustling, modern life of the north.

JUNEAU, Alaska, June 26.—If you to type ancient Alaska, gilded Juneau, the capital, stands for the new romance of the colossal land, with brains and machinery taking the place of luck and gold stampedes.

The three great mines of Juneau are extracting fortunes from ore at which the old prospector would have sneered.

It is the youngsters of technical training who are setting the pace here.

Making good means slicing down the cost of production.

The superintendent who can lop a cent a ton from the operating cost is a genius, in the estimation of the stockholders.

And the remarkable thing is that the men in command are scarcely 30—a little more than boys.

Youngsters giving account of their brains. Justifying their training. Mak-

ing good with the precision and smooth efficiency of a machine.

They work with acres of machinery, rolling like thunder, with thousands of tons of ore to produce ounces of gold at the end of shift.

They harness and dam glacial streams, or tap mountain lakes for power; lead owlish gangs of miners into these modern Aladdin's caves, matching the careless chaos of nature with the certainty of mathematical axioms and the relentless, patient nip of drills; the sundering force of giant powder.

Boys in khaki performing the miracles of demi-gods!

Henry Ford is well represented in the traffic of the streets, and Paris in the gowns of the women who lead the social life. Moving picture houses compete for patronage, and merchants are aggrieved if the stranger asks dubiously whether they carry

such-and-such an article. Juneau shows what capital can do in Alaska, for itself and the country. None of the ore in this region could be profitably handled except by modern machinery in big quantities per day, for tons of ore produce only ounces of gold.

The Gastineau mine, for instance, concentrates 6,000 tons of low grade stuff daily, at a total cost of 64 cents per ton, and a value of not over 2.00 per ton in a plant capitalized at \$10,000,000.

Gastineau, with hydro-electric power, boasts of having reduced its power to 2 cents per ton of output, as against 20 cents per ton at the Treadwell mine.

No victorious general could have worn a more exultant smile than the young superintendent who told about this achievement.

Alaska is going to make room for many young men of that caliber.
